

ANGEL SCUTARI

<FULL-STACK WEB DEV/>

ABOUT ME

I'm a developer with a plethora of ideas and projects brewing in the cauldron of my mind; my primary objective is to optimize processes and resources to achieve unparalleled efficiency.

My innate curiosity and proclivity for problem-solving allows me to quickly and effortlessly uncover solutions to even the most complex of conundrums.

PROJECTS

Full Stack:

- Social network and blog for mental health specialists.
- Clothes e-commerce to practice and learn Firebase.
- V-pet game in React Native.

Back-end:

- Several tiny programs for media files conversion and a scraper with image-to-text function
- Translated and revamped a Tarot API.
- One Piece API with NestJs, TypeORM and Postgres.

Front-end:

- QR Generator in NextJS.
- My portfolio with Tailwind and React.
- Several tiny apps with HTML, CSS and Vanilla Javascript.

PROJECTS

Trés Bien e-Commerce (MERN stack)

<https://tres-bien-app.vercel.app/>

- MongoDB database.
- API REST made with Express + Typescript.
- React && Redux front-end. Material UI.
- Payment methods: MercadoPago, Stripe y Paypal.
- Admin Mode.
- Filter by colour, size, price, etc.

"Individual Projects" (PERN stack)

- Database with respective models done in PostgreSQL and Sequelize.
- Consumes data from an external API.
- Maps the data with different criteria to raise a local server with their respective routes.
- Renders different cards in Home with the possibility of accessing their details.
- React forms to create objects in the database.
- Filtered by properties and by database.
- Pagination.
