PERSONAL PROJECTS

Fullstack:

- Scientific dissemination blog and social network for mental health specialists. It gathers articles and research in the area to be translated and offered to the community to bring knowledge to those who do not practice the original language of publication. The social section is aimed at evaluating articles, networking and volunteering for translations. (MongoDB, Express, Node, NextJs).
- E-commerce for clothing sales developed for educational purposes using the MERN stack and Firebase (MongoDB, Express, ReactJs, Node).
- V-pet video game in React Native.

Back-end:

- Various tiny apps that offer media file conversion and a scraper with a function to transfer an image file to text.(NodeJs)
- Tarot REST API. Originally from a third party; I took the liberty of translating it, extending it and adding more features to offer a more complete service. (NodeJs, Express)
- REST API de One Piece con NestJs, TypeORM y Postgres

Front-end:

- QR code generator with customization features (size, colors and readability) and batch creation. (NextJS, Tailwind)
- My portfolio with Tailwind, React and responsive design.
- Several small applications with HTML, CSS and Vanilla Javascript

LANGUAGES:

- ENGLISH C2 (EF-SET)
- Native Spanish

SOFT SKILLS:

- Creative
- Decisive

- Communicative
- Enterprising
- Agile learner
